

Student - teacher Interactions

By Isaac,Charlie and Taitimu

1. What are we interested in? (Taitimu)

As a group we are interested to know why teachers don't interact with us so much like during P.E, Cross Country and The Literacy apps like Spelling, Writing and Maths.

2. Our Data (Charlie)

Our Data shows that Students think that most teachers aren't interacting in Class time and Outside time

Statements

- All Classes agreed that teachers should interact with all students
- All classes wanted teachers to join in, in P.E and your Literacy Subjects
- $\frac{2}{3}$ of our classes voted higher then 5, On a scale of 1/10' and said that people aren't as independent but 1 class voted 4 because people are more independent.

3. Our Dream (Charlie)

Our Dream Future is to encourage teachers to join in with activities like P.E/Health and Literacy activities

This means getting them more involved in lots more activities

5. What we need from you(Isaac)

Before I say what we want, I have a question. 'What do you want to see from your teachers (when they are getting involved)'

We want our principals to look out at the teachers and to see them joining in, in P.E activities and when they walk inside, they see them getting involved in the Literacy activities

How we can make it easier

[How to Fix the Problems](#)
